LOCATION

OUR GUARANTEE

All our plants are guaranteed to be true to name, top quality, healthy and free of insects or disease. If you have any problems or concerns, please contact us. Trees and shrubs are guaranteed for one year from date of purchase and for the original purchase value. Our guarantee applies to trees or shrubs that fail to grow after being properly planted and cared for in a recommended area. Guarantee excludes damage done by animals, chemicals, vandalism or nursery stock planted in above ground containers. The original receipt and nursery stock must be presented prior to or at time of adjustment. For more information on returns of plant material, please call us at 403.346.5613.

We are also offering a 5 year warranty on trees and shrubs with purchase of MYKE. Ask our specialist for details. www.premiertech.com/myke

HOME DELIVERY

We realize that some of our customers may not have the ability to transport their statuary, planters, trees or furniture to their home. We can recommend a delivery service for your convenience. There is a fee for delivery and prior arrangements need to be made. **Bulk delivery now available through our Blue Bag Program (see page 24).** Please contact our information centre for all your delivery inquiries.

THE BLUE CUBE

- Top Quality Soil Mixes and much more in a 1 cu yd Bag
- Delivered to your house with NO MESS
- Recyclable Bag that you return to the garden centre

See our staff for more information on the Blue Cube

Less Water Sod Available as well for 2018

ONLINE GARDENING CLUB

Join our Online Gardening Club. You will receive our up to date and informative news letters, plus special discount coupons. Sign up today at www.parklandgarden.ca

COURSES

We offer spring, summer, fall and winter courses. For a complete listing, visit our website at www.parklandgarden.ca

PRIVATE GARDEN TOUR

View spectacular private gardens in and around Red Deer. Registration in advance required, limited space.

**Thursday, July 19
from 5:45 p.m. - 9:00 p.m.**

WEDDINGS

Planning a special outdoor garden wedding? Call us for details!

CRAFT AND MARKET SALES

Held on each of the following Saturdays, admission is a donation to the food bank accepted.

**November 10, 17 and 24th
December 1, 8 and 15th
10:00 a.m. - 4:00 p.m.**

ICE SCULPTURES

Come out and visit us mid-December to view our world renowned ice sculptures. Make sure to visit us inside as well for an amazing array of Christmas treasures, giftware, poinsettias and much more.

ALFRED

A certified horticulturist & greenhouse manager with over 32 + years of experience, a master on roses and a radio personality.

TRUDY

Bachelor of Applied Horticulture, Certification in Floral Design and is a Canadian Accredited Floral Designer with over 20 + years experience.

CHRISTINE

Bachelor of Applied Horticulture, who enjoys all the new technology. The tree and shrub expert, Christine has been with us over 30 + years.

SERENA

Horticulture diploma with a major in landscaping design. Serena has been with us for over 15 years providing quality landscape design for our customers.

BBQ DELIGHT

Cooking With Herbs

Learn top-notch cooking tips with the award winning, Executive Chef Emmanuel David from Boulevard Restaurant & Lounge. Enjoy an exciting afternoon with tips on how to BBQ with fresh, locally grown herbs as the Chef prepares a delicious tasting meal for your friends and family. Chef Emmanuel David is known for selecting only the fresh, local ingredients for every meal he cooks, leading him to become known as one of Alberta's finest Chefs. A great gift idea for the man in your life!

Cost: \$40.00 plus GST
Saturday June 16, 11:00am – 1:00pm

WATER WISE GARDENING

Have you ever dreamed of a low maintenance garden? With our world going "green," a great place to start is in your own yard. Xeriscaping can reduce the time spent working in your yard and increase the time spent enjoying it. Attend this course and **receive a valuable coupon for low maintenance plants.**

Cost: \$20.00 plus GST
Thursday June 14, 7:00pm – 8:30pm

GOING TO THE BEACH

Miniature Garden

Create a mini beach in your own miniature garden. Bring along someone special and create a garden together! Plants and container supplied. Additional accessories available for purchase.

Cost: \$40.00 plus GST
Saturday July 7, 10:00am – 11:00am

*Not exactly as shown

PRIVATE GARDEN TOUR

View some spectacular hidden horticultural highlights in and around Red Deer. Travel in a luxury coach accompanied by our staff to guide you through and answer all your questions regarding these beautiful yards and gardens. Come dressed for the weather, wear your good walking shoes, and bring your camera!

Thursday July 19, 5:45pm – 9:00pm

POLLINATOR GARDEN

What's the Buzz?!

Pollinators are vital to the production of food and to the health and stability of ecosystems worldwide. Join Cynthia Pohl (local ecological landscape designer and Green Roof Professional) to learn about our local pollinators and how you can design your gardens to be pollinator friendly. You will learn about what pollinators are, why they are important and what you can do to help ensure pollinator health. **Each person will receive a coupon for a free perennial. Handouts included.**

Cost: \$20.⁰⁰ plus GST
Saturday June 16, 9:30am – 10:30am

SPECTACULAR CONTAINER GARDENING

Create your own amazing patio container planter perfect for your entry way or patio. Choose from many of our exotic flowering and foliage plants as well as edible plants. All supplies included

*Extra fee may apply for unique plants or accessories

Cost: \$65.⁰⁰ plus GST
Saturday June 9, 10:00am – 11:00am

AMAZING ANNUALS FOR 2018

BY ALFRED

Here at Parkland we bring in over 50,000 rooted cuttings of all the patented varieties of ornamental annuals we have come to be known for. This covers over 500 varieties this year, of which over 80 are brand new varieties not seen here before. Many of the petunias with orange in their color make-up have gone by the wayside due to importation regulations, but that just made room for yet more new exciting varieties!

In addition to these new varieties, we are growing more plants in larger pots, hanging baskets and patio planters for instant beauty and easier gardening.

Also, we have acquired a new soil blend with coir chunks incorporated in it for better moisture retention in our hanging baskets and patio planters, as well as having MYKE incorporated in our soil blend for enhanced growth capabilities.

These are just a few of the additions to our plant selection.

Bidens

“**Pretty In Pink**” – Improved bright pink,
 “**White Delight**” – Snow white with yellow center,
 “**Bidy Boom Red**” – Brick-red blooms

Calibrochoa “Can Can Pink Bumble Bee” – Brand new tricolor variety. Pink blooms darkening to deep rose with a yellow star in the center – truly striking

Dipladenia Summer Romance Yellow – Beautiful new yellow flowering climbing vine for full sun.

Coleus

“**Hipsters Zooey**” – Compact growing, slender chartreuse leaves with red striations,
 “**Macaw**” – Medium vigour with lemon colored leaves deeply serrated with burgundy edges

Sunflower
“Sunfinity Yellow Dark Eye” – An all-new variety of sunflower that blooms all summer on multiple branches. Yellow blooms with larger petals and a smaller centre. A great new cut flower.

Petunia

“Ray Pistachio Cream” – Cream color blooms with green edges and highlights. Mounding habit and very weather tolerant.

“Summer Double” – Salmon, rose and white – a new series of double flowered petunia that require little to no deadheading for more continuous bloom.

Thunbergia

“Rose Sensation & White Halo” – Two new colors in the popular climbing vines – bright pink and creamy white,
“Slice-A-Peel” – From Proven Winners a new bicolor with red-orange petals edged in cream.

BRING ON THE HEAT!

BY ALFRED

How hot are the hot peppers and how do they compare to our regular peppers? Pepper “Heat” (Capsacin) is measured in Scoville Units. The larger the number, the hotter the pepper. Capsacin is what is in peppers that lends the heat to our favorite spicy foods. It is also the ingredient in pepper spray that is used to deter unwanted attacks, and in bird and animal repellents. Caution is advised when handling peppers, rated over 40 to 50,000 units; wear gloves and long-sleeved clothing. All peppers grow best in a sunny sheltered location that is very warm.

There has been an increasing demand recently for hotter peppers and we have found sources of them for you. We dare you to try them!

Carolina Reaper

Ghost Pepper

Trinidad Scorpion

INCREDIBLE EDIBLES WITH PIZZAZZ

BY ALFRED

We garden for various reasons. Some of us are after an economical source of healthy food. To that end we plant all the usual staple varieties. But while we are achieving the desired result, many of us are looking to grow more than just the “same old, same old”. This produces a huge desire to search out the new, unusual and unique.

Also, our growing spaces are getting progressively smaller and our culinary palettes are growing more diverse. All of these desires are driving plant breeders and developers to produce many new varieties of edibles to fit the bill. Heritage and Heirloom varieties are being used to create hybrids with improved disease resistance, more compact growth, quicker maturing, heavier yielding along with unique colors and flavours not seen before and they're still all Non-GMO. We at Parkland have the distinct pleasure of bringing in many of these, or growing them, for all our local gardening friends.

Candy Cane Peppers

Pink Tiger Tomatoes

PEPPERS

There are several new varieties:

Candy Cane – a new sweet bell pepper with decorative variegated green and white leaves

Roulette – a new habanero type without the heat, so the citrusy flavour dominates

Sureno – a larger slightly hotter variety of Jalapeno pepper that grows in cooler conditions than its predecessors.

TOMATO

Valentine – new AAS variety for 2018, tasty new grape tomato from Maine

Little Birdy – Red Robin, Rosy Finch and yellow Candy. Early colourful 2-3cm fruits produced heavily on compact plant, great in patio planters

Pink Tiger – elongated grape type tomato yellow with red stripes an indeterminate plant

Totem – new compact variety with 3-4cm fruits, great for patio pots.

MUSTARD

Miz America – AAS for 2018. New red mustard greens variety to add flavour to salads

We will also have compact versions of peas and beans in hanging baskets and patio bowls. Now you can grow these tasty treats on your balcony along with the flowers.

THE BEAUTY OF BEETS

By Christine

Beets are one of nature's best foods. Grown for their leaves and roots they are a tasty option for the dinner table. **These varieties are some of the best:**

- 1 Albino Beet**
A beet variety from Holland. Completely white sweet roots with delicious flavour. This beet never stains! For best color and to avoid green tops, blanch roots by hilling up with soil.
- 2 Early Blood Turnip Beet**
Good all-purpose variety with dark red flesh that is sweet, crisp, and tender. Excellent market and home garden variety for summer and autumn use.
- 3 Burpee's Golden Beet**
Dual purpose beet for roots and greens. Roots are globe-shaped and bright orange, turning golden-yellow when cooked. Tender and mild even when large. Will not bleed like red beets. Sweet flavorful leaves
- 4 Detroit Dark Red Beet**
Great for canning and fresh eating, this variety is prolific and a good keeper, producing round, blood-red, 3"-diameter roots.
- 5 Yellow Intermediate Mangel Beet**
White and yellow ringed roots measure 4-6½" long and vary in shape. While mangel beets are larger than typical beets, you'll find the sweet, juicy, and smooth textured.
- 6 Chioggia Beet**
Noted for its alternating red-and-white concentric rings that resemble a bull's-eye, this variety is wonderful for both fresh eating and pickling. It retains its markings if roasted whole and sliced just before serving.

SPRING BULBS FOR SUMMER 2018

BY ALFRED

Pacific Ocean Dahlia

Bulbs planted in spring (late April – Early May) will provide some of the most spectacular flowers to grace our summer gardens, as well as the most amazing cut-flowers. For many years Parkland has carried the best selection of these in Central Alberta, and this year is no exception. Each year we have many totally new introductions to add to our gardens. Here are some of this year's highlights:

DAHLIAS

Bohemian Spartacus – a beautiful two tone decorative dahlia in burgundy and cream

Pacific Ocean – a tropical sunrise coloured variety with yellow centres progressing through pink to lavender at the tips

Winesome – a dinner plate tricolour with 25cm blooms in red and white stripe with white tips on each petal

CANNA

Phaison – a tropical looking plant for full sun, with large leaves in warm sunset colors, also producing spikes of warm orange blooms

ANEMONE

Bordeaux – rich deep burgundy coloured blooms. Frost tolerant.

LILY

Starlight Starbright – Fragrant Oriental Lilies in numerous striped colours

GLADIOLUS

Zita – tall stately spikes of blooms in soft lime green with magenta highlights

Find all these and many more in Central Alberta's best spring bulb selection at Parkland Garden Centre.

HARDY BLUEBERRIES FOR CENTRAL ALBERTA

BY CHRISTINE

The North Series of blueberries are extremely hardy hybrid blueberries. The series has both high and low bush varieties and are excellent for fresh eating or cooking. All blueberries require highly acidic soils, excellent drainage and a good mulch. Plant with plenty of peat moss. They prefer afternoon shade and good snow cover for wintering.

Northblue

Is a small shrub that has an upright spreading habit. It produces clusters of blue round berries which are usually ready for picking in mid summer.

Northcountry

A hardy hybrid blueberry which forms a broad mounded shrub, excellent fall color and produces bumper crops of tasty sweet blue fruit in summer.

Northland

is a highbush blueberry, produces amazing crops of sweet dark blue fruit in early summer.

NorthSky

This is a multi-stemmed deciduous shrub with an upright spreading habit of growth. The berries have a sweet taste and a firm texture.

We Value What You Value

HOW SWEET IT IS

BY SERENA

When most people think of bees it usually breaks down into two categories: love them, they are great; or terrible stinging pests. No matter what category you fall into, we are just now coming to realize how important they are to us (humans). If we, the human race, expect to survive then we need to ensure the survival of bees and other pollinators.

The UN (United Nations) has declared May 20 as World Bee Day. So what does that mean? Whether or not you love bees they are an important factor in our food sources; everyone who enjoys their coffee in the morning needs to thank the bees. If you think about it, the economy relies on pollination because without it we don't get our food crops.

In Alberta alone we have seven native varieties of bees. The honey bees that we see were brought in from Europe.

Native bees are:

- Andrenid Bee
- Bumble Bees (19 varieties alone)
- Digger Bees
- Halictid Bee
- Leafcutting Bee
- Plasterer Bee
- Polymorphic Sweat Bee

These bees are often solitary and rarely sting if left alone. They generally only sting when they are threatened. We rely on them for our food production; when you consider pollinators are responsible for a third of our food production we need to start listening to bees.

What can you do to help?

Plant bee friendly plants, minimize pesticides in your landscape and bee aware.

What are bee friendly plants?

Monarda (Bee Balm)	Veronicas
Coneflowers	Dianthus
Daisies	Gaillardia
Liatris (Gayfeather)	Zinnia
Hollyhocks (biennial) or Phlox	Marigold
Delphinium	Sunflower
Lupines	Pansy/Viola
Salvia	Stocks
Dianthus	Centaurea
Cat Mint	Bidens
Lupines	Cosmos
Thyme	Borage

An added bonus to this practice is that more butterflies and humming birds will also appear!

How to minimize pesticides in your landscapes:

- Use hand removal of weeds or other non-chemical weed removal.
- Use biodiversity in planting to discourage large damaging insect populations.
- Encourage spider populations to capture damaging insects.
- Remember, we all want a beautiful world to be involved in; it is up to us to make it that way.

When you can't find the **PERFECT GIFT** let them pick their own.

GROWING CLEMATIS IN CENTRAL ALBERTA

Clematis can be rewarding to grow and a beautiful addition to your garden. They are some of the very few blooming perennial vines that grow in our climate.

Here are a few tips:

PLANTING CLEMATIS

In colder climates where temperatures drop below 0°F (-20°C) foundation planting and mulch are required to ensure a long life. Tricks to having success is heat on the top and shade on the roots. These conditions are necessary for the clematis to grow and thrive. Watch when you plant clematis that you are careful with the stems for they break easily and require extra care when transplanting. They prefer east or west exposures.

PRUNING CLEMATIS

Group (C) is the only type of pruning group we recommend in our climate. These varieties bloom only on the current year's growth. Blooms commence in early summer and continue through to fall. Plants should be cut back in late April to two strong sets of buds on each stem as close to ground level as possible. This will provide a plant with blooms that start near ground level and continue to the top of the plant.

Hydrangea Moonrock™
from our award-winning Lavalamp™ Series

It's bloomin' easy to have the yard you desire.

Our prairie hardy, low-maintenance collection is available at Parkland Garden Centre while supplies last.

GROWOYA

An ancient form of localized plant irrigation, ollas (we call them Oyas like they're pronounced) are terracotta pots that you plant in your garden to save water, save time and make your growing easier. Terracotta is a porous material—and even more so when fired at a low temperature—allowing the water inside to seep out slowly through the walls to water your plants at the roots.

This makes Oyas a low tech, high efficiency, self watering system. Save a whole bunch of water (up to 70% water savings from surface watering), save your valuable time (water only once a week!) and grow easy (less weeds, less guesswork, better plants).

HYDRANGEAS FOR CENTRAL ALBERTA

PROVIDED BY PROVEN WINNERS

Proven Winners' top 10 hydrangeas do well here in Central Alberta and require very little care. They are adaptable from sun to shade and bold blooms make them a great addition to your garden. Come see our sales staff for more information on each of the individual growing needs.

LITTLE QUICK FIRE

A dwarf form of Quick Fire® with white flowers that turn deep pink in summer and remain attractive into fall.

INCREDIBALL

Improvement over 'Annabelle' with massive white flower heads and stronger stems that hold up even after a heavy rain.

INVINCIBLE II SPIRIT

The very first pink 'Annabelle'-type hydrangea, being replaced this year by the improved Invincible Spirit II which boasts much stronger stems and improved flowering performance; rebloomer.

LITTLE LIME

A dwarf form of 'Limelight' with soft green flowers that turn deep pink in fall.

QUICK FIRE

Blooms on this super-hardy and easy to grow hydrangea are produced on new wood, which means that you will see flowers even after the harshest winters.

INVINCIBLE RUBY

The dark burgundy red flower buds of Invincible Ruby open to a two-toned combination of bright ruby red and silvery pink.

LIME RICKY

The flowers start out a fresh green and age to rich jade, all accented with pink pollen for a unique accent.

LIMELIGHT

Multiple award-winning panicle hydrangea with creamy white flowers that age to green, then pink. Blooms without fail every year.

PINKY WINKY

Pinky Winky has an unusual name, and an even more unusual flower. The large white panicles open in mid to late summer, and as summer turns to fall the florets at the base of the panicles turn pink.

BOBO

This dwarf panicle hydrangea will turn heads! Bobo® hydrangea is engulfed by large white flowers in summer.

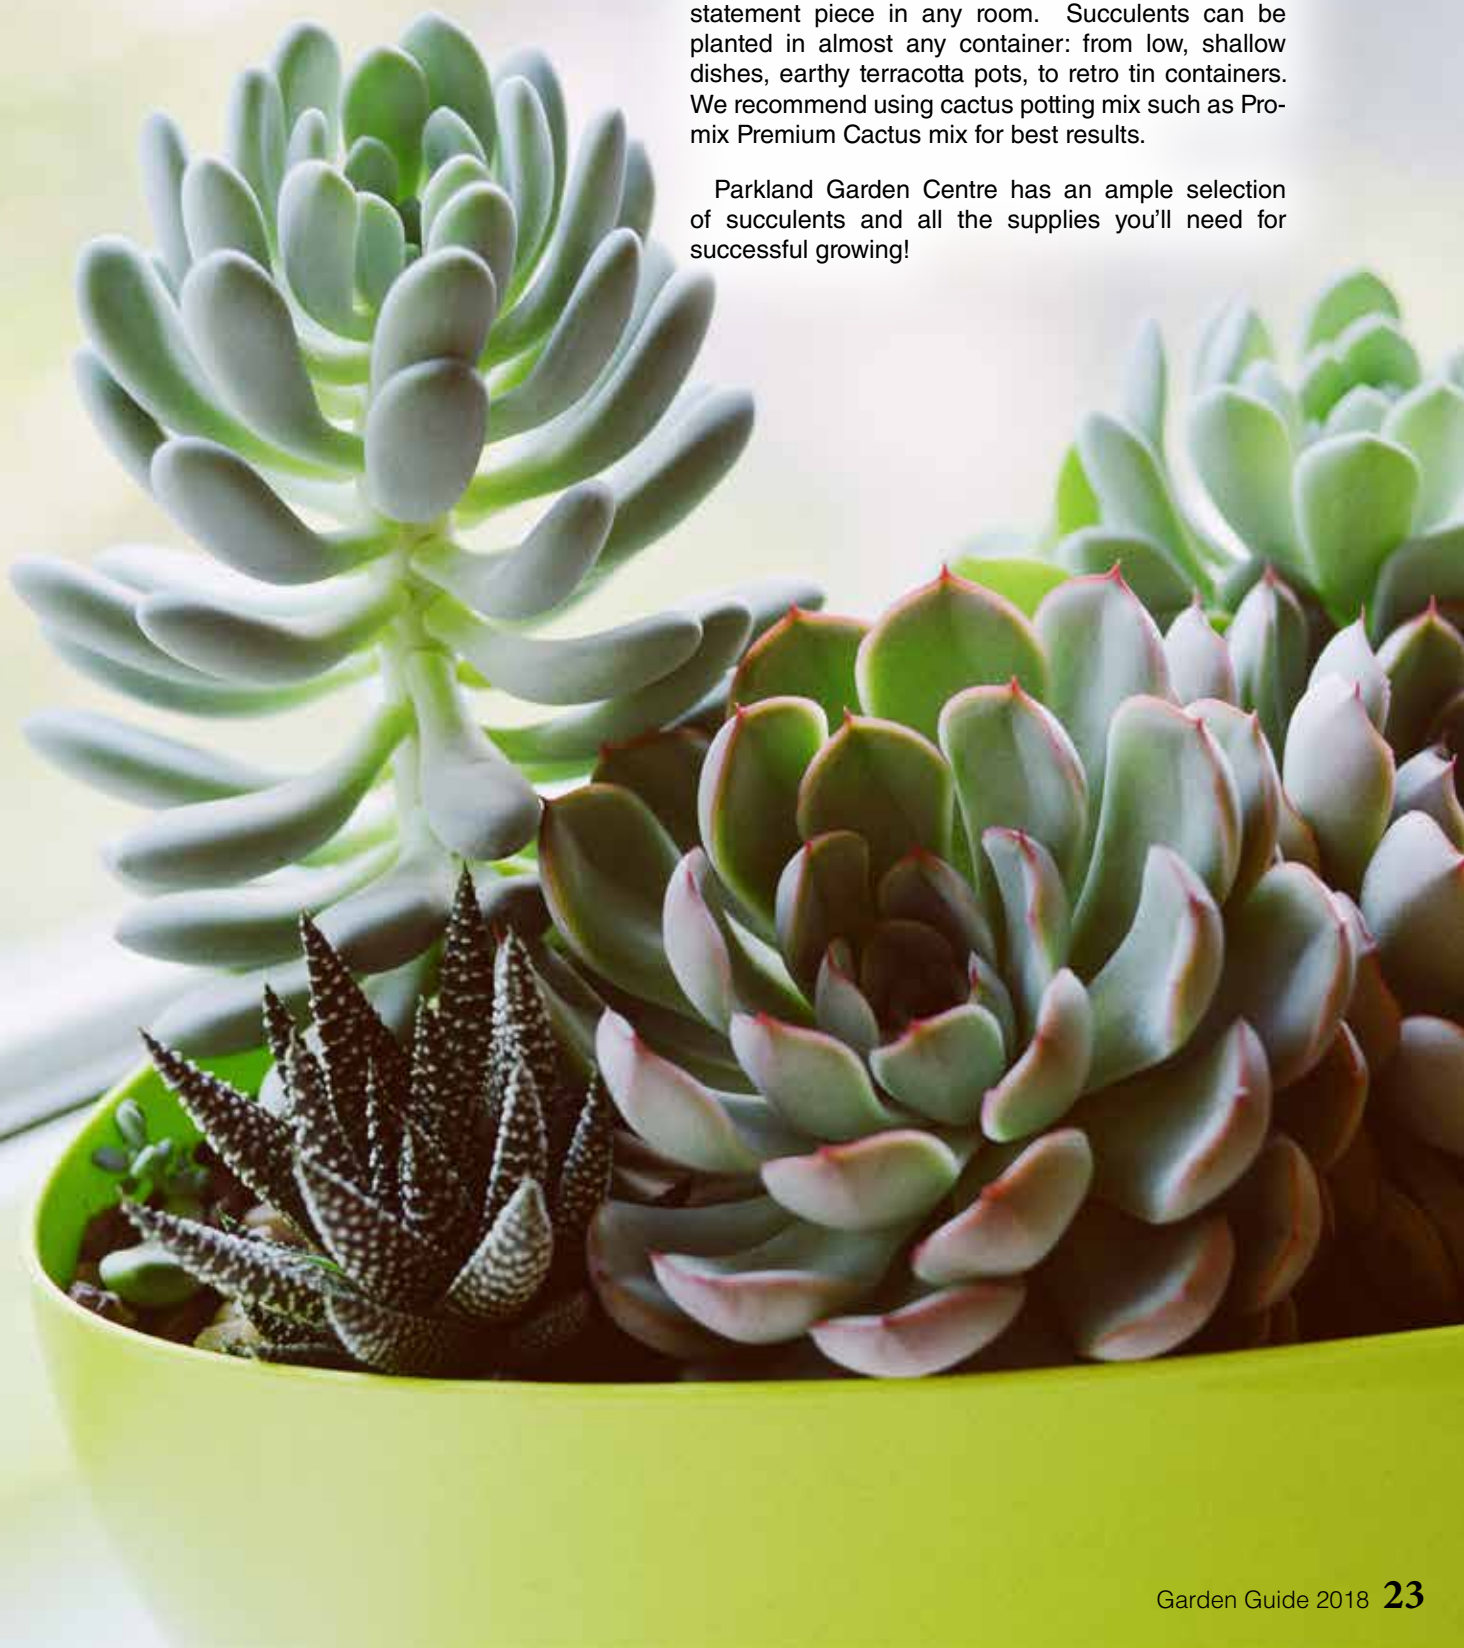

SUCCULENTS: PRACTICAL, ADORABLE AND BEAUTIFUL

BY TRUDY

Succulents are a group of plants that are characterized by their thick, fleshy leaves. They come in several different colors (even pink and blue!), they can be upright, rosette shaped, or trailing. While some house plants require careful watering and maintenance, succulents are happiest when they are slightly dry and left alone to grow and fill whatever container they're planted in. There are some hardy forms of succulents for our area but most are grown indoors or put outside for the summer only. To ensure the best color and growth provide at least a few hours of direct sun each day.

These plants have become popular because of their wide array of colors and fascinating shapes. When paired with a matching pot, these plants become a statement piece in any room. Succulents can be planted in almost any container: from low, shallow dishes, earthy terracotta pots, to retro tin containers. We recommend using cactus potting mix such as Pro-mix Premium Cactus mix for best results.

Parkland Garden Centre has an ample selection of succulents and all the supplies you'll need for successful growing!

NATURE'S TREATS

What tastes better than jams and syrups rich with the summery taste of locally grown berries? How about munching on crisp, pickled asparagus or carrots that were grown in sunny Alberta fields? We have what you're craving! Come and see for yourself the abundant selection of locally produced preserves, syrups and seasonings. We carry products from the Innisfail Grower's Co-op, sparkling ciders from apple farms in Ontario and savoury seasonings from Salt West Naturals on Vancouver Island.

For those with a sweet tooth, join us at Christmas as we showcase Chocolate Moose Fudge from Moose Jaw and premium chocolates from Roger's Chocolates in Victoria. These are only some of the flavourful products available at Parkland Garden Centre!

Less Water Sod Available as well for 2018

SALT WEST NATURAL SEA SALTS

Saltwest Naturals produces hand-harvested Canadian sea salt and natural mineral sea soaks from the pristine coastal waters of Vancouver Island, Canada. Their products are crafted in micro-batches using forced evaporation as well as efficient modern technology. With a sustainable touch, using reverse osmosis, the salinity of the seawater increases and fresh potable water is produced as a by-product. Steam Kettles boil water to make pure Rain Coast Flor de Sal flakes, delicious organic infused flavours, and our gourmet smoked sea salt.

Come and choose from a great selection at Parkland Garden Centre.

SWEET SMOKEY MAPLE SALMON

- ① Season salmon with sweet Smokey Maple Sea Salt by rubbing 2 tps per 100g.
- ② Preheat grill to medium
- ③ Place salmon on grill for 10-20 minutes until salmon flakes. Cooking times will vary depending on thickness of Salmon.

THE POWER OF PROTEIN

Francois Michaud

With the widespread dissemination of science based nutrition information, our awareness about the value and benefits of plants as a source of protein has greatly increased. The popularity of plant based eating is currently the strongest trend in health and food.

If you have watched documentaries like “Forks over knives” or the most recent “What the health” you should have come to the same conclusion. Even if you will never even think of going vegan, the truth is North Americans eat 50 to 75 per cent too much animal protein.

Most official nutrition organizations recommend a far more modest protein intake. The DRI (Dietary Reference Intake) is 0.8 grams of protein per kilogram of body weight, or 0.36 grams per pound. This amounts to: 56 grams per day for the average sedentary man and 46 grams per day for the average sedentary woman.

Consumption figures show we eat on average 80+ grams of protein a day. So not only do we eat too much meat, but we are missing out on important benefits from plant-based foods. Health-wise plants have the advantage of having fibre, phytonutrients and are in general alkalizing to the body.

With this in mind, I would recommend the following:

- **Replace dairy milk with any plant based milk**
- **Limit meat consumption to 2- 3 time a WEEK (not a day)**
- **Learn to grow your proteins in your own garden**

Here's some of the best vegetable proteins you should think of growing this summer.

Green beans: A protein powerhouse. One cup of green beans contains 12.48 grams of protein and over 16 grams of fibre.

Asparagus. The season for fresh asparagus is fleeting, so indulge in early spring. Asparagus has 2.16 grams of protein and only 20 calories for 6 spears. Roast it, steam it or grill it lightly.

Peas. A legume, one cup of peas contains almost 9 grams of protein. Steam peas or eat them fresh in salads or as a snack.

Kale. Known for its cancer-fighting abilities, kale has 2.47 grams of protein and only 27 calories per 1 cup serving.

Broccoli. Steamed broccoli has a mild flavour most people enjoy. It also has almost 2 grams of protein per ½ cup serving.

Pumpkin & Squash Seeds

Growing pumpkins and squash is a lot of fun, and serves multiple purposes, especially if you grow small, easy-to-manage varieties. You can eat the vegetables' flesh in soups, pies, and muffins, and then roast those seeds into crunchy, protein-rich snacks.

Sunflower seeds. Not only beautiful but each flower will carry between 1000 to 2000 of their the protein packed seeds

Corn. I love corn on the cob during peak season and usually turn this into a single meal by making 3 or 4 cobs, each providing 4 grams of protein.

Brussels sprouts. This cool-season vegetable has almost 4 grams of protein per 1 cup serving. I roast mine with a little bit of olive oil and sea salt. Simple, fast and best “chips” you'll ever have; yes even if you hate brussel sprouts.

Soybean (edamame). I kept this one last because soybeans have had such bad press, but If you grow them from heirloom seeds it is the best source of healthy & clean protein. You should really give this one a try. If you seed inside, find your warmest area of your garden and it is certainly possible to grow it in Alberta.

With all these possibilities, take advantage of your friendly specialists at Parkland Garden Center.

Oh! And remember to get some herbs to use in the fabulous dishes you will be making from your new crop!
